Aqua Icelander

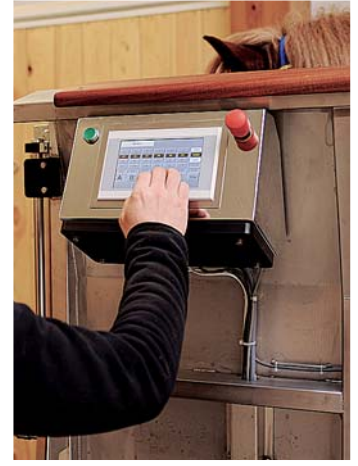

Simply Better

- The Aqua Icelander Treadmill is a perfect choice for maximum results in the training program for every horse trainer.
- The equipment doesn't need any special construction for installation, only flat surface approx 25 square meters.
- The operation is through touch panel and is fully programmable in a very user friendly environment.
- Up to 100 storable programs possible, so every horse has his one tailor-made program and the trainer can follow up and monitor the exercise.
- The water level is adjustable from 0 cm up to 1,2 meter water level.
- Incline option can be set from 0-10% for uphill work.
- The Aqua Icelander Treadmill can also be used as a dry treadmill for different purpose.
- Status of water level, running speed, belt incline, and training time is displayed and can be adjusted simultaneously.
- Aqua Icelander Treadmill is all stainless steel.
- Large safety glass windows on all sides, allow the operator to view the horse throughout the exercise program.

Stainless Steel

The material is stainless steel and high quality plastic. The operation with the horse is flexible and easy to manage. It is proven to meet the highest standards of ergonomic and physical design. The cabinet has glass windows on both sides and doors on both ends with glass window to monitor the movement of the horse. Two doors make the entry and exiting easy for the horse and operator. The training belt allows tilting for exercising up hill and gives the trainer more possibilities in training programs.

Simply Better

All control like belt speed, distance/time, water level and tilting of the belt, is programmable on a touch screen and can be stored in special programs for different training of the horses. Up to 100 storable programs are possible. This function is very user friendly in use. Status of water level, running speed, belt incline, and time are displayed through the training and can be adjustable simultaneously.
