# MJÖLNIR

Dry fish valsing machine

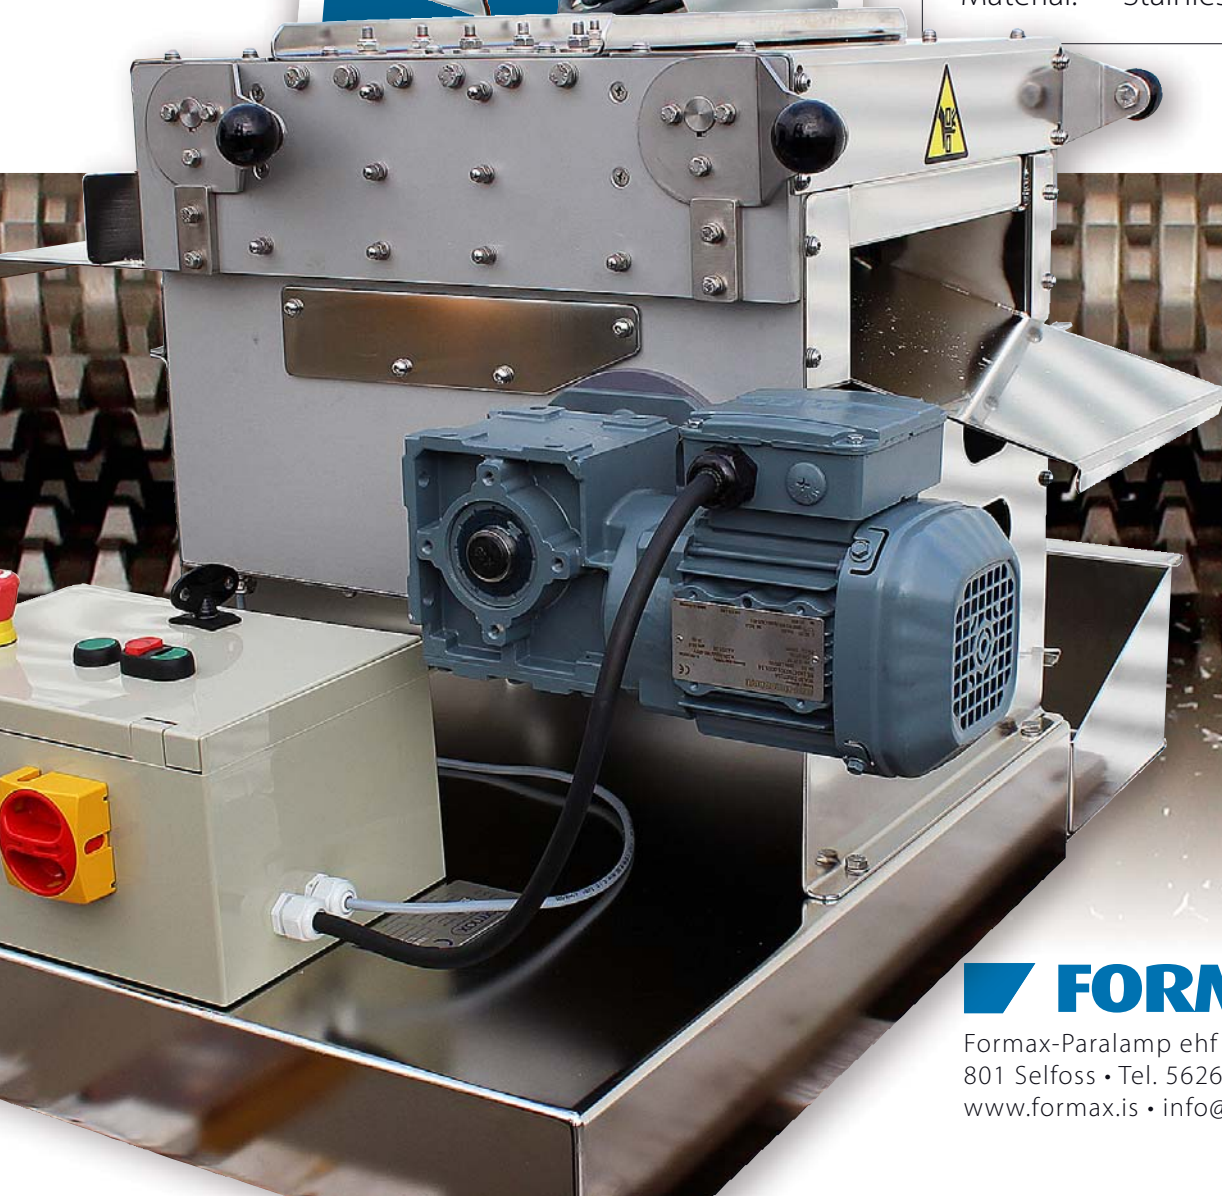

**Mjólnir** is a machine specially designed to roller dry fish fillets. The machine possesses three pairs of rolling. All the rollers are motorized, both top and bottom. The pressure of the rollers is opposite to each other with a strong spring that allows the machine to roller various thickness of fillets. Upper rollers can also be set up or down to gain diverse adjustment possibilities for different products. Two handles steer stepless adjustment for the pressure.

#### Technical information:

Power:	0,37 kw	Gear: 1=36
Speed:	38 °/mín.	0,14 m/sek
Ability:	500 m/klst.	
Length:	975 mm	
Width:	708 mm	
Height:	600 mm	
Material:	Stainless steel EU 1.4301
